4A+, 4A, 2A-

EXPERIENCES

Software Engineer Intern – WORQ

1 July 2024 – 31 January 2025
- Developed a full-stack company website from scratch, ensuring responsive design and smooth backend integration.
- Maintained and optimized the company's existing WordPress platform for performance and security.
- Implemented automation using webhooks to streamline internal workflows and reduce manual tasks

ICT INOV – 13/10/2023
- I was involved in showcasing a 6-degree-of-freedom (6DOF) robotic arm to university students in Women Engineering Day, explaining its features, applications, and how it works in the field of robotics.

Programming League Nation – 18/5/2023
- I joined a data structure coding championship and successfully advanced to the final stage, highlighting my competence and skill in the competition.

Google Cloud Platform For Everyone GCPE – 4/4/2023

- Actively engaged in completing various exercises and a small project. This project included tasks such as setting up a gaming server and developing a website on the Google Cloud Platform.

EXTRACURRICULARS & LEADERSHIP

- Young Officer of Reserve Officer Training Unit (ROTU)-present
- Head of the Department of Intellect: Belia Harmoni - present
- An active member for Persatuan Komputer UM (PEKOM) – present
